IIE Transactions (1999) **31**, 1195–1207

DESIGN & MANUFACTURING

AUTHOR INDEX FOR 1999

Anand, S. and S. Damodarasamy; *Evaluation of minimum zone for flatness by normal plane method and simplex search*; July; 617

Ben-Arieh, D.; *Geometrical reasoning based on attributed graph grammar for prismatic parts*; January; 61
Benjaafar, S. and D. Gupta; *Workload allocation in multi-product, multi-facility production systems with setup times*; April; 339
Blanchard-Gaillard, D., C.A. Yano, J.M.Y. Leung and M.J. Brown; *Discrete deterministic and stochastic blending problems with two quality characteristics: aluminum blending*; October; 1001
Boer, M. and R. Logendran; *A methodology for quantifying the effects of product development on cost and time*; April; 365
Braha, D.; *Manufacturing control of a serial system with binomial yields, multiple production runs, and non-rigid demand: a decomposition approach*; January; 1
Brown, M.J., D. Blanchard-Gaillard, C.A. Yano and J.M.Y. Leung; *Discrete deterministic and stochastic blending problems with two quality characteristics: aluminum blending*; October; 1001
Busby, J.S.; *Problems in error correction, learning and knowledge of performance in design organisations*; January; 49

Cavalier, T.M., D.L. Wheeler and E.A. Lehtihet; *An implicit enumeration approach to tolerance allocation in sequential tolerance control*; January; 75
Chang, T.-C. and A. Joneja; *Setup and fixture planning in automated process planning systems*; July; 653
Chen, M.-C. and C.-T. Su; *Computer-aided optimization of multi-pass turning operations for continuous forms on CNC lathes*; July; 583

Damodarasamy, S. and S. Anand; *Evaluation of minimum zone for flatness by normal plane method and simplex search*; July; 617
Davidson, B., U. Roy and C. Ludden; *An expert system for the design and analysis of composite structures*; April; 303

El-Haik, B. and K. Yang; *The components of complexity in engineering design*; October; 925

Frazelle, E.H., Byung Chun Park and J.A. White; *Buffer sizing models for end-of-aisle order picking systems*; January; 31
Fu, M.W., J.Y.H. Fuh and A.Y.C. Nee; *Generation of optimal parting direction based on undercut features in injection molded parts*; October; 947
Fuh, J.Y.H., M.W. Fu and A.Y.C. Nee; *Generation of optimal parting direction based on undercut features in injection molded parts*; October; 947

Gadh, R. and N. Shyamsundar; *Geometric abstractions to support disassembly analysis*; October; 935
Gupta, D. and S. Benjaafar; *Workload allocation in multi-product, multi-facility production systems with setup times*; April; 339

Harris, J.H. and S.G. Powell; *An algorithm for optimal buffer placement in reliable serial lines*; April; 287
Herrman, J.W., G. Ioannou, I. Minis and J.M. Proth; *Minimization of acquisition and operational costs in horizontal material handling system design*; July; 679
Hlupic, V. and R.J. Paul; *Guidelines for selection of manufacturing simulation software*; January; 21
Hocknell, A., S. Mitchell, D. Underwood and R. Jones; *Feature based quadrilateral mesh generation for sculptured surface products*; July; 627
Hodgson, T.J., M.G. Kay, R.O. Mittal and Shih-Yi Tang; *Evaluation of cylindricity using combinatories*; January; 39
Hopp, W.J., R.Q. Zhang and M.L. Spearman; *An easily implementable hierarchical heuristic for a two-echelon spare parts distribution system*; October; 977

Ioannou, G., J.W. Herrman, I. Minis and J.M. Proth; *Minimization of acquisition and operational costs in horizontal material handling system design*; July; 679

Jeong, Keun-Chae and Yeong-Dae Kim; *An approximation method for performance analysis of assembly/disassembly systems with parallel-machine stations*; April; 391
Joneja, A. and T.-C. Chang; *Setup and fixture planning in automated process planning systems*; July; 653
Jones, R., A. Hocknell, S. Mitchell and D. Underwood; *Feature based quadrilateral mesh generation for sculptured surface products*; July; 627

Kay, M.G., T.J. Hodgson, R.O. Mittal and Shih-Yi Tang; *Evaluation of cylindricity using combinatories*; January; 39
Khoshnevis, B., D.N. Sormaz and J.Y. Park; *An integrated process planning system using feature reasoning and space search-based optimization*; July; 597
Kim, Yeong-Dae and Keun-Chae Jeong; *An approximation method for performance analysis of assembly/disassembly systems with parallel-machine stations*; April; 391
Kodkani, S.S. and U. Roy; *Product modeling within the framework of the World Wide Web*; July; 667
Kusiak, A. and A. Zakarian; *Forming teams: an analytical approach*; January; 85

Lee, H.F.; *Optimal design for flexible manufacturing systems: generalized analytical methods*; October; 965
Lee, H.F. and E.C. Sewell; *The strip-packing problem for a boat manufacturing firm*; July; 639
Lehtihet, E.A., D.L. Wheeler and T.M. Cavalier; *An implicit enumeration approach to tolerance allocation in sequential tolerance control*; January; 75
Leung, J.M.Y., D. Blanchard-Gaillard, C.A. Yano and M.J. Brown; *Discrete deterministic and stochastic blending problems with two quality characteristics: aluminum blending*; October; 1001
Liao, J. and U. Roy; *Geometric reasoning for re-allocation of supporting and clamping positions in the automated fixture design system*; April; 313
Linn, R. and H. Liu; *An automatic assembly liaison extraction method and assembly liaison model*; April; 353
Liu, H. and R. Linn; *An automatic assembly liaison extraction method and assembly liaison model*; April; 353
Liu, P.Y. and C. Ou-Yang; *Applying the topological relationships of form features to retrieve part files from a CAD system*; April; 323
Logendran, R. and M. Boer; *A methodology for quantifying the effects of product development on cost and time*; April; 365
Ludden, C., B. Davidson and U. Roy; *An expert system for the design and analysis of composite structures*; April; 303

McGinnis, L.F. and B.A. Peters; *Strategic configuration of flexible assembly systems: a single period approximation*; April; 379
Minis, I., J.W. Herrman, G. Ioannou and J.M. Proth; *Minimization of acquisition and operational costs in horizontal material handling system design*; July; 679

0740-817X © 1999 "IIE"

Mitchell, S., A. Hocknell, D. Underwood and R. Jones; *Feature based quadrilateral mesh generation for sculptured surface products*; July; 627

Mittal, R.O., T.J. Hodgson, M.G. Kay and Shih-Yi Tang; *Evaluation of cylindricity using combinatories*; January; 39

Moses, S.A.; *Due date assignment using feedback control with reinforcement learning*; October; 989

Nee, A.Y.E., M.W. Fu and J.Y.H. Fuh; *Generation of optimal parting direction based on undercut features in injection molded parts*; October; 947

Ohno, K. and Z. Xiaobo; *Modeling for flexible manufacturing systems with an FMS blocking mechanism and a BDSM job routing*; October; 957

Ou-Yang, C. and P.Y. Liu; *Applying the topological relationships of form features to retrieve part files from a CAD system*; April; 323

Park, Byung Chun; *Optimal dwell point policies for automated storage/retrieval systems with dedicated storage*; October; 1011

Park, Byung Chun, E.H. Frazelle and J.A. White; *Buffer sizing models for end-of-aisle order picking systems*; January; 31

Park, J.Y., B. Khoshnevis and D.N. Sormaz; *An integrated process planning system using feature reasoning and space search-based optimization*; July; 597

Paul, R.J. and V. Hlupic; *Guidelines for selection of manufactuing simulation software*; January; 21

Peters, B.A. and L.F. McGinnis; *Strategic configuration of flexible assembly systems: a single period approximation*; April; 379

Powell, S.G. and J.H. Harris; *An algorithm for optimal buffer placement in reliable serial lines*; April; 287

Proth, J.M., J.W. Herrman, G. Ioannou and I. Minis; *Minimization of acquisition and operational costs in horizontal material handling system design*; July; 679

Reasor, R.J. and E.M. Wicks; *Designing cellular manufacturing systems with dynamic part populations*; January; 11

Roy, U., B. Davidson and C. Ludden; *An expert system for the design and analysis of composite structures*; April; 303

Roy, U. and J. Liao; *Geometric reasoning for re-allocation of supporting and clamping positions in the automated fixture design system*; April; 313

Roy, U. and S.S. Kodkani; *Product modeling within the framework of the World Wide Web*; July; 667

Sewell, E.C. and H.F. Lee; *The strip-packing problem for a boat manufacturing firm*; July; 639

Shyamsundar, N. and R. Gadh; *Geometric abstractions to support disassembly analysis*; October; 935

Sormaz, D.N., B. Khoshnevis and J.Y. Park; *An integrated process planning system using feature reasoning and space search-based optimization*; July; 597

Spearman, M.L., W.J. Hopp and R.Q. Zhang; *An easily implementable hierarchical heuristic for a two-echelon spare parts distribution system*; October; 977

Su, C.-T. and M.-C. Chen; *Computer-aided optimization of multi-pass turning operations for continuous forms on CNC lathes*; July; 583

Tang, Shih-Yi, T.J. Hodgson, M.G. Kay and R.O. Mittal; *Evaluation of cylindricity using combinatories*; January; 39

Underwood. D., A. Hocknell, S. Mitchell and R. Jones; *Feature based quadrilateral mesh generation for sculptured surface products*; July; 627

Wheeler, D.L., T.M. Cavalier and E.A. Lehtihet; *An implicit enumeration approach to tolerance allocation in sequential tolerance control*; January; 75

White, J.A., Byung Chun Park and E.H. Frazelle; *Buffer sizing models for end-of-aisle order picking systems*; January; 31

Wicks, E.M. and R.J. Reasor; *Designing cellular manufacturing systems with dynamic part populations*; January; 11

Xiaobo, Z. and K. Ohno; *Modeling for flexible manufacturing systems with an FMS blocking mechanism and a BDSM job routing*; October; 957

Yang, K. and B. El-Haik; *The components of complexity in engineering design*; October; 925

Yano, C.A., D. Blanchard-Gaillard, J.M.Y. Leung and M.J. Brown; *Discrete deterministic and stochastic blending problems with two quality characteristics: aluminum blending*; October; 1001

Zakarian, A. and A. Kusiak; *Forming teams: an analytical approach*; January; 85

Zhang, R.Q., W.J. Hopp and M.L. Spearman; *An easily implementable hierarchical heuristic for a two-echelon spare parts distribution system*; October; 977

SUBJECT INDEX FOR 1999

1000

Davidson, B., U. Roy and C. Ludden; *An expert system for the design and analysis of composite structures*; April; 303

1010

Fu, M.W., J.Y.H. Fuh and A.Y.C. Nee; *Generation of optimal parting direction based on undercut features in injection molded parts*; October; 947

Ou-Yang, C. and P.Y. Liu; *Applying the topological relationships of form features to retrieve part files from a CAD system*; April; 323

1030

Busby, J.S.; *Problems in error correction, learning and knowledge of performance in design organisations*; January; 49

El-Haik, B. and K. Yang; *The components of complexity in engineering design*; October; 925

Zakarian, A. and A. Kusiak; *Forming teams: an analytical approach*; January; 85

1050

Hocknell, A., S. Mitchell, D. Underwood and R. Jones; *Feature based quadrilateral mesh generation for sculptured surface products*; July; 627

Roy, U. and S.S. Kodkani; *Product modeling within the framework of the World Wide Web*; July; 667

1060

Boer, M. and R. Logendran; *A methodology for quantifying the effects of product development on cost and time*; April; 365

1210

Linn, R. and H. Liu; *An automatic assembly liaison extraction method and assembly liaison model*; April; 353

Shyamsundar, N. and R. Gadh; *Geometric abstractions to support disassembly analysis*; October; 935

1280

Blanchard-Gaillard, D., C.A. Yano, J.M.Y. Leung and M.J. Brown; *Discrete deterministic and stochastic blending problems with two quality characteristics: aluminum blending*; October; 1001

Hodgson, T.J., M.G. Kay, R.O. Mittal and Shih-Yi Tang; *Evaluation of cylindricity using combinatories*; January; 39

Khoshnevis, B., D.N. Sormaz and J.Y. Park; *An integrated process planning system using feature reasoning and space search-based optimization*; July; 597

Lee, H.F. and E.C. Sewell; *The strip-packing problem for a boat manufacturing firm*; July; 639
Su, C.-T. and M.-C. Chen; *Computer-aided optimization of multi-pass turning operations for continuous forms on CNC lathes*; July; 583

1320

Xiaobo, Z. and K. Ohno; *Modeling for flexible manufacturing systems with an FMS blocking mechanism and a BDSM job routing*; October; 957

1330

Jeong, Keun-Chae and Yeong-Dae Kim; *An approximation method for performance analysis of assembly/disassembly systems with parallel-machine stations*; April; 391

1350

Braha, D.; *Manufacturing control of a serial system with binomial yields, multiple production runs, and non-rigid demand: a decomposition approach*; January; 1
Moses, S.A.; *Due date assignment using feedback control with reinforcement learning*; October; 989

1360

Benjaafar, S. and D. Gupta; *Workload allocation in multi-product, multi-facility production systems with set-up times*; April; 339
Harris, J.H. and S.G. Powell; *An algorithm for optimal buffer placement in reliable serial lines*; April; 287
Herrman, J.W., G. Ioannou, I. Minis and J.M. Proth; *Minimization of acquisition and operational costs in horizontal material handling system design*; July; 679
Lee, H.F.; *Optimal design for flexible manufacturing systems: generalized analytical methods*; October; 965
Peters, B.A. and L.F. McGinnis; *Strategic configuration of flexible assembly systems: a single period approximation*; April; 379
Wicks, E.M. and R.J. Reasor; *Designing cellular manufacturing systems with dynamic part populations*; January; 11

1370

Hlupic, V. and R.J. Paul; *Guidelines for selection of manufacturing simulation software*; January; 21
Hopp, W., R.Q. Zhang and M.L. Spearman; *An easily implementable hierarchical heuristic for a two-echelon spare parts distribution system*; October; 977

1400

Park, Byung Chun, E.H. Frazelle and J.A. White; *Buffer sizing models for end-of-aisle order picking systems*; January; 31

1440

Park, Byung Chun; *Optimal dwell point policies for automated storage/retrieval systems with dedicated storage*; October; 1011

1500

Damodarasamy, S. and S. Anand; *Evaluation of minimum zone for flatness by normal plane method and simplex search*; July; 617

1515

Joneja, A. and T.-C. Chang; *Setup and fixture planning in automated process planning systems*; July; 653

1520

Ben-Arieh, D.; *Geometrical reasoning based on attributed graph grammar for prismatic parts*; January; 61
Roy, U. and J. Liao; *Geometric reasoning for re-allocation of supporting and clamping in the automated fixture design system*; April; 313

1530

Wheeler, D.L., T.M. Cavalier and E.A. Lehtihet; *An implicit enumeration approach to tolerance allocation in sequential tolerance control*; January; 75

GUEST REVIEWERS FOR 1999

Ali Akgunduz, University of Illinois at Chicago
Can Akkan, Koc University
Tayfur Altiok, Rutgers University

S.X. Bai, University of Florida
Albert Baker, University of Cincinnati
Egon Balas, Carnegie Mellon University
Andy Banerjee, University of Illinois at Chicago
Rajan Batta, SUNY Buffalo
Denis Blackmore, New Jersey Institute of Technology
Royce Bowden, Mississippi State University
H. Van Brussel, Katholieke Universiteit Leuven
Ronald Buitenhek, KPN Research

Wei Chen, University of Illinois at Chicago
Frank Ciarallo, The University of Arizona
Paul Cohen, Penn State University

J. Darzentas, University of the Aegean
Abhijit Deshmukh, FAMU-FSU College of Engineering
Jian Dong, University of Connecticut

Gershon Elber, Technion – Israel Institute of Technology

Richard Francis, University of Florida at Gainesville

Stanley Gershwin, MIT

Zhong-Sheng Hua, Chinese University of Science & Technology

George Ioannou, Virginia Tech
Anand Iyer, i2 Technologies

Cecil Joe, Utah State University
M. Eric Johnson, Vanderbilt University

Sungmin Kang, The Catholic University of Korea
Michael Kay, North Carolina State University
K.H. Kim, Pusan National University, Korea
Lucy King, Kettering University
F. Koumboulis, University of Thessaly
Ehud Kroll, University of Missouri-Columbia/Kansas City
Mary Beth Kurz, The University of Arizona
Andrew Kusiak, The University of Iowa

Mark Lawley, Purdue University
Herve LeBihan, Université Pierre et Marie Curie
Kemper Lewis, SUNY at Buffalo

Roland Malhame, Ecole Polytechnique de Montreal

Bryan Norman, University of Pittsburgh

C. Papadopoulos, University of the Aegean
Brett Peters, Texas A&M University
E. Pistikopoulos, Imperial College

Tzvi Raz, Tel Aviv University
Spiros Reveliotis, Georgia Tech

Radha Sarma, Iowa State University
S. Sethi, The University of Texas at Dallas
Moshe Shpitalni, Technion – Israel Institute of Technology
David Sinriech, Technion – Israel Institute of Technology
J.S. Smith, Texas A&M University
Diomidis Spinellis, University of the Aegean
Hartmut Stadtler, Institut für Betriebswirtsschaftslehre FG Fertigungs-und Materialwirtschaft

Valerie Tardiff, University of Texas - Austin
Ulrich A.W. Tetzlaff, George Mason University

D. Thurston, University of Illinois at Urbana-Champaign

R. Uzsoy, Purdue University

Asoo Vakharia, University of Florida at Gainesville
A.P. Vepsalainen, Helsinki School of Economics

L. Van Wassenhove, INSEAD
Chung-Te Wu, Quintet Inc.

Dan Zetu, University of Illinois at Chicago

SCHEDULING & LOGISTICS

AUTHOR INDEX FOR 1999

Agrawal, N. and M.A. Cohen; *An analytical comparison of long and short term contracts*; August; 783

Al-Yakoob, S.M., H.D. Sherali and M.M. Hassan; *Fleet management models and algorithms for an oil-tanker routing and scheduling problem*; May; 395

Azizoglu, M. and O. Kirca; *Scheduling jobs on unrelated parallel machines to minimize regular total cost functions*; February; 153

Bard, J.F. and R.Z. Ríos-Mercado; *A branch-and-bound algorithm for permutation flow shops with sequence-dependent setup times*; August; 721

Bozkurt, Z., S. Kulturel, N.E. Ozdemirel and C. Sepil; *Experimental investigation of shared assignment policies in automated storage/retrieval systems*; August; 739

Cai, Xiaoqiang and Chung-Yee Lee; *Scheduling one and two-processor tasks on two parallel processors*; May; 445

Carlyle, M., K. Knutson, K. Kempf and J. Fowler; *Lot-to-order matching for a semiconductor assembly and test facility*; November; 1103

Cheng, T.C.E. and Chung-Lun Li; *Due-date determination with resequencing*; February; 183

Cheng, T.C.E. and G. Wang; *Scheduling the fabrication and assembly of components in a two-machine flowshop*; February; 135

Cohen, M.A. and N. Agrawal; *An analytical comparison of long and short term contracts*; August; 783

Cormier, D., A. Weintraub, T. Hodgson, R. King, J. Wilson and A. Zozom; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093

Culbreth, C.T., A.R. Yaghubian, T.J. Hodgson, J.A. Joines and J.C. Huang; *Dry kiln scheduling in furniture production*; August; 733

Daniels, K. and R.B. Grinde; *Solving an apparel trim placement problem using a maximum cover problem approach*; August; 763

Dar-El, E.M., B. Golany and N. Zeev; *Controlling shop floor operations in a multi-family, multi-cell manufacturing environment through constant work-in-process*; August; 771

Dar-El, E.M., Y.T. Herer and M. Masin; *CONWIP-based production lines with multiple bottlenecks: performance and design implications*; February; 99

Dogan, K. and M. Goetschalckx; *A primal decomposition method for the integrated design of multi-period production–distribution systems*; November; 1027

Elmaghraby, S.E. and K.A. Thoney; *The two-machine stochastic flowshop problem with arbitrary processing time distributions*; May; 467

Fowler, J., K. Knutson, K. Kempf and M. Carlyle; *Lot-to-order matching for a semiconductor assembly and test facility*; November; 1103

Gademann, A.J.R.M. and J.P. van den Berg; *Optimal routing in an automated storage/retrieval system with dedicated storage*; May; 407

Gao, Y. and C.R. Sox; *The capacitated lot sizing problem with setup carry-over*; February; 173

Garg, A.; *An application of designing products and processes for supply chain management*; May; 417

Gerchak, Y. and D.M. Kilgour; *Optimal parallel funding of research and development projects*; February; 145

Goetschalckx, M. and K. Dogan; *A primal decomposition method for the integrated design of multi-period production–distribution systems*; November; 1027

Golany, B., E.M. Dar-El and N. Zeev; *Controlling shop floor operations in a multi-family, multi-cell manufacturing environment through constant work-in-process*; August; 771

Grinde, R.B. and K. Daniels; *Solving an apparel trim placement problem using a maximum cover problem approach*; August; 763

Hassan, M.M., H.D. Sherali and S.M. Al-Yakoob; *Fleet management models and algorithms for an oil-tanker routing and scheduling problem*; May; 395

Herer, Y.T., E.M. Dar-El and M. Masin; *CONWIP-based production lines with multiple bottlenecks: performance and design implications*; February; 99

Hodgson, T., A. Weintraub, D. Cormier, R. King, J. Wilson and A. Zozom; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093

Hodgson, T.J., A.R. Yaghubian, J.A. Joines, C.T. Culbreth and J.C. Huang; *Dry kiln scheduling in furniture production*; August; 733

Huang, J.C., A.R. Yaghubian, T.J. Hodgson, J.A. Joines and C.T. Culbreth; *Dry kiln scheduling in furniture production*; August; 733

Joines, J.A., A.R. Yaghubian, T.J. Hodgson, C.T. Culbreth and J.C. Huang; *Dry kiln scheduling in furniture production*; August; 733

Karabati, S. and P. Kouvelis; *Cyclic scheduling in synchronous production lines*; August; 709

Kempf, K., K. Knutson, J. Fowler and M. Carlyle; *Lot-to-order matching for a semiconductor assembly and test facility*; November; 1103

Kilgour, D.M. and Y. Gerchak; *Optimal parallel funding of research and development projects*; February; 145

King, R., A. Weintraub, D. Cormier, T. Hodgson, J. Wilson and A. Zozom; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093

Kirca, O. and M. Azizoglu; *Scheduling jobs on unrelated parallel machines to minimize regular total cost functions*; February; 153

Klein, C.M., Xiaoqing Sun and J.S. Noble; *Single-machine scheduling with sequence dependent setup to minimize total weighted squared tardiness*; February; 113

Knutson, K., K. Kempf, J. Fowler and M. Carlyle; *Lot-to-order matching for a semiconductor assembly and test facility*; November; 1103

Kouvelis, P. and S. Karabati; *Cyclic scheduling in synchronous production lines*; August; 709

Kulturel, S., N.E. Ozdemirel, C. Sepil and Z. Bozkurt; *Experimental investigation of shared assignment policies in automated storage/retrieval systems*; August; 739

Laguna, M.; *A heuristic for production scheduling and inventory control in the presence of sequence-dependent setup times*; February; 125

Lee, Chung-Yee and Xiaoqiang Cai; *Scheduling one and two-processor tasks on two parallel processors*; May; 445

Liaw, Ching-Fang; *Applying simulated annealing to the open shop scheduling problem*; May; 457

Li, Chung-Lun and T.C.E. Cheng; *Due-date determination with resequencing*; February; 183

Masin, M., E.M. Dar-El and Y.T. Herer; *CONWIP-based production lines with multiple bottlenecks: performance and design implications*; February; 99
Matson, J.E., B.S. Vaidyanathan, J.O. Matson and D.M. Miller; *A capacitated vehicle routing problem for just-in-time delivery*; November; 1083
Matson, J.O., B.S. Vaidyanathan, D.M. Miller and J.E. Matson; *A capacitated vehicle routing problem for just-in-time delivery*; November; 1083
Miller, D.M., B.S. Vaidyanathan, J.O. Matson and J.E. Matson; *A capacitated vehicle routing problem for just-in-time delivery*; November; 1083

Nagi, R. and A.M. Sarmiento; *A review of integrated analysis of production–distribution systems*; November; 1061
Noble, J.S., Xiaoqing Sun and C.M. Klein; *Single-machine scheduling with sequence dependent setup to minimize total weighted squared tardiness*; February; 113

Ozdemirel, N.E., S. Kulturel, C. Sepil and Z. Bozkurt; *Experimental investigation of shared assignment policies in automated storage/retrieval systems*; August; 739

Parija, G.R. and B.R. Sarker; *Operations planning in a supply chain system with fixed-interval deliveries of finished goods to multiple customers*; November; 1075
Parlar, M. and Z.K. Weng; *Integrating early sales with production decisions: analysis and insights*; November; 1051

Ríos-Mercado, R.Z. and J.F. Bard; *A branch-and-bound algorithm for permutation flow shops with sequence-dependent setup times*; August; 721

Sarker, B.R. and G.R. Parija; *Operations planning in a supply chain system with fixed-interval deliveries of finished goods to multiple customers*; November; 1075
Sarmiento, A.M. and R. Nagi; *A review of integrated analysis of production–distribution systems*; November; 1061
Sen, A. and A.X. Zhang; *The newsboy problem with multiple demand classes*; May; 431
Sepil, C., S. Kulturel, N.E. Ozdemirel and Z. Bozkurt; *Experimental investigation of shared assignment policies in automated storage/retrieval systems*; August; 739
Sherali, H.D., S.M. Al-Yakoob and M.M. Hassan; *Fleet management models and algorithms for an oil-tanker routing and scheduling problem*; May; 395
Sox, C.R. and Y. Gao; *The capacitated lot sizing problem with setup carry-over*; February; 173
Sriskandarajah, C. and E. Wagneur; *Lot streaming and scheduling multiple products in two-machine no-wait flowshops*; August; 695
Sun, Xiaoqing, J.S. Noble and C.M. Klein; *Single-machine scheduling with sequence dependent setup to minimize total weighted squared tardiness*; February; 113
Swaminathan, J.M. and S.R. Tayur; *Managing design of assembly sequences for product lines that delay product differentiation*; November; 1015

Tayur, S.R. and J.M. Swaminathan; *Managing design of assembly sequences for product lines that delay product differentiation*; November; 1015
Thoney, K.A. and S.E. Elmaghraby; *The two-machine stochastic flowshop problem with arbitrary processing time distributions*; May; 467

Vaidyanathan, B.S., J.O. Matson, D.M. Miller and J.E. Matson; *A capacitated vehicle routing problem for just-in-time delivery*; November; 1083
van den Berg, J.P.; *A literature survey on planning and control of warehousing systems*; August; 751
van den Berg, J.P. and A.J.R.M. Gademann; *Optimal routing in an automated storage/retrieval system with dedicated storage*; May; 407

Wagneur, E. and C. Sriskandarajah; *Lot streaming and scheduling multiple products in two-machine no-wait flowshops*; August; 695
Wang, G. and T.C.E. Cheng; *Scheduling the fabrication and assembly of components in a two-machine flowshop*; February; 135
Weintraub, A., D. Cormier, T. Hodgson, R. King, J. Wilson and A. Zozom; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093
Weng, Z.K.; *Strategies for integrating lead time and customer-order decisions*; February; 161
Weng, Z.K.; *The power of coordinated decisions for short-life-cycle products in a manufacturing and distribution supply chain*; November; 1037
Weng, Z.K. and M. Parlar; *Integrating early sales with production decisions: analysis and insights*; November; 1051
Wilson, J., A. Weintraub, D. Cormier, T. Hodgson, R. King, and A. Zozom; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093

Yaghubian, A.R., T.J. Hodgson, J.A. Joines, C.T. Culbreth and J.C. Huang; *Dry kiln scheduling in furniture production*; August; 733

Zeev, N., B. Golany and E.M. Dar-El; *Controlling shop floor operations in a multi-family, multi-cell manufacturing environment through constant work-in-process*; August; 771
Zhang, A.X. and A. Sen; *The newsboy problem with multiple demand classes*; May; 431
Zozom, A., A. Weintraub, D. Cormier, T. Hodgson, R. King and J. Wilson; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093

SUBJECT INDEX FOR 1999

1370
Dar-El, E.M., Y.T. Herer and M. Masin; *CONWIP-based production lines with multiple bottlenecks: performance and design implications*; February; 99

1440
van den Berg, J.P.; *A literature survey on planning and control of warehousing systems*; August; 751

1450
Kulturel, S., N.E. Ozdemirel, C. Sepil and Z. Bozkurt; *Experimental investigation of shared assignment policies in automated storage/retrieval systems*; August; 739

2000
Grinde, R.B. and K. Daniels; *Solving an apparel trim placement problem using a maximum cover problem approach*; August; 763

3000
Sen, A. and A.X. Zhang; *The newsboy problem with multiple demand classes*; May; 431

3090
Cohen, M.A. and N. Agrawal; *An analytical comparison of long and short term contracts*; August; 783
Weng, Z.K.; *Strategies for integrating lead time and customer-order decisions*; February; 161

3130

Cormier, D., A. Weintraub, T. Hodgson, R. King, J. Wilson and A. Zozom; *Scheduling with alternatives: a link between process planning and scheduling*; November; 1093

3140

Dogan, K. and M. Goetschalckx; *A primal decomposition method for the integrated design of multi-period production–distribution systems*; November; 1027

3150

Garg, A.; *An application of designing products and processes for supply chain management*; May; 417

Parija, G.R. and B.R. Sarker; *Operations planning in a supply chain system with fixed-interval deliveries of finished goods to multiple customers*; November; 1075

Weng, Z.K.; *The power of coordinated decisions for short-life-cycle products in a manufacturing and distribution supply chain*; November; 1037

Weng, Z.K. and M. Parlar; *Integrating early sales with production decisions: analysis and insights*; November; 1051

3205

Sarmiento, A.M. and R. Nagi; *A review of integrated analysis of production–distribution systems*; November; 1061

3255

Sherali, H.D., S.M. Al-Yakoob and M.M. Hassan; *Fleet management models and algorithms for an oil-tanker routing and scheduling problem*; May; 395

Vaidyanathan, B.S., J.O. Matson, D.M. Miller and J.E. Matson; *A capacitated vehicle routing problem for just-in-time delivery*; November; 1083

van den Berg, J.P. and A.J.R.M. Gademann; *Optimal routing in an automated storage/retrieval system with dedicated storage*; May; 407

3300

Knutson, K., K. Kempf, J. Fowler and M. Carlyle; *Lot-to-order matching for a semiconductor assembly and test facility*; November; 1103

Sox, C.R. and Y. Gao; *The capacitated lot sizing problem with setup carry-over*; February; 173

3400

Azizoglu, M. and O. Kirca; *Scheduling jobs on unrelated parallel machines to minimize regular total cost functions*; February; 153

Cheng, T.C.E. and G. Wang; *Scheduling the fabrication and assembly of components in a two-machine flowshop*; February; 135

Golany, B., E.M. Dar-El and N. Zeev; *Controlling shop floor operations in a multi-family, multi-cell manufacturing environment through constant work-in-progress*; August; 771

Sun, Xiaoqing, J.S. Noble and C.M. Klein; *Single-machine scheduling with sequence dependent setup to minimize total weighted squared tardiness*; February; 113

Swaminathan, J.M. and S.R. Tayur; *Managing design of assembly sequences for product lines that delay product differentiation*; November; 1015

3500

Lee, Chung-Yee and Xiaoqiang Cai; *Scheduling one and two-processor tasks on two parallel* processors; May; 445

3530

Laguna, M.; *A heuristic for production scheduling and inventory control in the presence of sequence-dependent setup times*; February; 125

Liaw, Ching-Fang; *Applying simulated annealing to the open shop scheduling problem*; May; 457

Li, Chung-Lun and T.C.E. Cheng; *Due-date determination with re-sequencing*; February; 183

Ríos-Mercado, R.Z. and J.F. Bard; *A branch-and-bound algorithm for permutation flow shops with sequence-dependent setup times*; August; 721

Yaghubian, A.R., T.J. Hodgson, J.A. Joines, C.T. Culbreth and J.C. Huang; *Dry kiln scheduling in furniture production*; August; 733

3540

Gerchak, Y. and D.M. Kilgour; *Optimal parallel funding of research and development projects*; February; 145

Sriskandarajah, C. and E. Wagneur; *Lot streaming and scheduling multiple products in two-machine no wait flowshops*; August; 695

3570

Kouvelis, P. and S. Karabati; *Cyclic scheduling in synchronous production lines*; August; 709

3580

Elmaghraby, S.E. and K.A. Thoney; *The two-machine stochastic flowshop problem with arbitrary processing time distributions*; May; 467
